"Brother Bills" Preparing Three Days Unparalleled Merriment on Sept. 3-5-6

Will Be Biggest Carnival in History of Coleman Under
the Direction of the Elks Lodge—Will Devote
Proceeds to Community Welfare.

"Prepare for the three biggest days you have yet experienced" is the word passed around in Elk circles in anticipation of the record breaking carnival to be staged in the Arena rink on Sept. 3-5-6, which includes the public holiday of Labor Day, so that brother Elks and visitors from nearby towns will doubtless avail themselves of the opportunity to join in the celebration here.

Already the committees have organized, and are busily preparing their various departments, for it is expected that the attractions at this carnival will exceed all that have gone before.

The Arena rink will be the scene of these three days of mirth and merriment, and the people of Coleman and the towns in the Pass will have the opportunity of trying their skill at various games in which they may win anything from a safe, by way of a baby elephant (stuffed, of course.) There will be the hams and the bacon, the kewpie dolls and chocolates, besides many other novelties, in fact you'll be mighty unlucky if you don't get something out of the array of presents which will be on display at the various booths.

The Blendwell orchestra will utilize their unexcelled talents to the utmost in entertaining the crowd each night of the carnival, and their music will make you dance whether you want to or not.

Prepare for a genuine fun-fest on these three days. And above all remember that the proceeds are used right in this community for the benefit of the people, so that in giving your support to the worthy efforts of the local Elks you are also helping yourselves.

Local Teaching Staff Is Now Complete

Three Vacancies Caused by Resignations Have Been Filled—
Schools Will Re-Open on
August 29th.

After some anxiety on the part of the school board as to the filling of vacancies on the teaching staff, all appointments are now made, and the staff will consist of sixteen all told, as follows:

Principal, David Hoyle; assistant principal, Miss Dorothy Pennington; assistant principal (in charge West Coleman) Miss Yull. Teachers—Miss Cox (new) formerly of Pincher Creek; Miss McKay, primary teacher; Miss Milligan, grade 8; Mrs. Clifford, in charge of West Coleman primary room; Miss M. E. Dunlop, Miss E. Hayson, Miss A. Odell, Miss Mackinnon, Miss G. Price, Miss C. Allan, Miss V. McDonald, Miss E. Dunlop and Miss M. Muir. Of the former staff, Principal Powell goes to Central High School, Calgary, as also does Assistant Principal Watt, and Miss Foster, whom Miss Cox succeeds resigning owing to her marriage.

The disposition of the various teachers will be made by the new principal on his taking charge at the re-opening of the schools. The secretary of the board is Mr. J. Ford, and the chairman is Mr. Thos. Johnson. The number of pupils is around 700.

Leaving Hospital Staff

Miss Mooney, who for the past eighteen months has been matron of the hospital here, leaves today for her home in Wawanesa, southern Manitoba, and her place will be taken by Mrs. Creighton, who comes here from the state of Washington, and who was for five years on the nursing staff of the Bellevue hospital. The good wishes of a large circle of friends will follow Miss Mooney on her resignation from the staff here.

Remember the dance in aid of the swimming pool in the Opera house, Coleman, on Wednesday evening next, August 10. By this means you can help the fund and make it possible for the committee to carry on without making a charge for the swimming pool.

Polish Ladies Bazaar

The ladies of the Polish Society are holding a bazaar on Monday next, August 8, in the vacant part of the Coleman Trading Co. store, from 3 o'clock. Various articles of fancy work will be on sale, fish-pond, etc., and there will also be a penny sale. Afternoon tea will be served, and everyone is cordially invited. There will be a drawing for a bedspread.

Musical Students in Happy Social Meet

Presentation Made to W. J. Harris
and Mrs. Curry in Appreciation
of Musical Instruction

A very successful term of music was brought to a close in the form of a party at the home of Mr. and Mrs. W. J. Harris, on Thursday July 28. The party commenced by playing games, and everyone thoroughly enjoyed themselves. In fact the fun and laughter could only be silenced by Mrs. Harris introducing lunch.

After all had done justice to the wonderful spread, Miss Phyllis Shone arose and presented Mrs. J. Curry of Bellevue with a case of silver on behalf of the pupils who did so well in the examinations. Miss Shone expressed their gratitude to Mrs. Curry for having so ably accompanied them at the exams. Mrs. Curry responded saying that her accompaniment would not have accomplished much had it not been for their own splendid performance. She hoped that they would retain their high standard next year, and she would certainly do all in her power to help them, and forever remember them for their kindness.

Following this James McDielen presented Mr. Harris with a cigarette case on behalf of the pupils. He said it was a token of gratitude for the splendid way in which they had been prepared for their exams, which had been such a success.

Mr. Harris thanked them cordially and said he was delighted to know that his pupils were so earnest in their work. He hoped each one would take as much interest this following year and success would be assured.

Mrs. C. S. Guimette is visiting with friends at Nelson.

"Safety First" Is Policy to Follow

Ed. Royle of Mine Rescue Car Set
Forth Some Hints on Precautionary Measures

As we hear so much nowadays of the phrase "Safety First" it makes us wonder if it is merely a catchy phrase to mislead workers in any industry and the general public. Without a doubt it is a significant phrase and means that the personal safety of all workers is paramount. It means that the workers and officials who have joined the "Safety First" movement hold the value of human life far above profits and the value of property. One has to admit that the movement has spread amazingly in all parts of the world and has been in a measure productive of much good. That it has not been productive of even greater results is due to suspicion. It may be suspicion on the part of the officials when they assume the attitude that "Safety First" means that safety is the first consideration after the largest possible production at a low cost. It is suspicion on the part of the workers when they think that precautionary rules and safety devices which are installed are just merely adopted to reduce them to work harder or reduce their earnings. As the basic industry in this district is coal mining Safety First will be viewed from that aspect. Without doubt it is not only means economy in human life, but it also means in many cases economy in operation to the management and increased earnings and comfort to the worker.

In the case of mine workers employed on day wages the carrying out of precautions whilst working does not effect their earnings in the least, but freedom from accidents which causes loss of time does certainly increase their earnings in the long run. Where the mine workers are paid by contract the same care may under certain circumstances result in a temporary slight loss during the day or several days, but taking it all through the earnings will equal or even exceed the average because he will be working under better conditions and with a greater feeling of increased safety. In no instance has it been known that where the rules of "Safety First" have been adopted has it cost the workers a cent as the cost of in-

With the Stores

Buyers will do well to study the various store advertisements and take advantage of the specials offered: They afford you a means of buying to the best advantage.

stalling safety devices has been met by the management. In many cases the expenditures have proved to be really good investments, by reducing the losses due to accidents. But to make "Safety First" rules and appliances most successful requires co-operation on the part of officials and workers. Without that the movement is a failure. Naturally when everything possible is done to insure safety and all are giving full support and co-operation to the movement one fact must be recognised, that no matter how perfect the rules and methods adopted may be, there will always be a certain element of danger in coal mining, and the only way to reduce the risk or even overcome it is by exercising continual vigilance and care.

Hillcrest Won Foot- ball Game Saturday

Scored Two Goals Over Local
Team in Spirted Game—Rain
Kept Crowded Away

On Saturday evening the Hillcrest football champions journeyed to Coleman full of enthusiasm and in each half of a keenly contested game scored a goal, while Coleman, despite their aggressive attacks and combination failed to land the pick-up under the bar.

Though they were able to keep the ball in Hillcrest territory they were unable to make the decisive shots that mean goals, and the Hillcrest goalie was right on the spot when any dangerous shots came near him.

The threatening weather kept the crowd away, there being only a few of the enthusiasts from Hillcrest and Coleman whom even the prospect of a drenching could not keep away.

The game finished up in a steady downpour, and players and spectators lost no time in seeking cover.

R. M. Reid of Macleod is relieving during the absence of Agent C. W. McKinnon, who is on a two weeks vacation.

Mr. and Mrs. J. Allan and children left on Sunday for Nelson to spend a couple of weeks holidays.

A Good Place to Live in Is The Crow's Nest Pass

Coleman Has Splendid Natural Attractions and is Also
Centre of Steam Coal Mining Industry.

Situated in the heart of the Rockies, amid all the splendours of mountain scenery, it would be very difficult to find a more agreeable place to live in than Coleman. Especially this summer have conditions been very pleasant. With copious rains and very little wind, the mountains have retained their freshness and verdure, and walk where one will there is a profusion of flowers to greet the eye.

One hears the praises of the "blue Alsatian mountains," but where can the beauties of the Canadian Rockies be excelled? Especially was this noticeable on Tuesday, when after a heavy downpour of rain on Saturday and Monday, the sky became clear, with here and there a fleecy cloud serving to mark the contrast of the azure blue of the Rockies. And towering above the surrounding hills in all its majesty is the Old Crow mountain and its companion of almost equal grandeur, Sentinel mountain.

He would indeed be unappreciative of the glories of Nature if he would not feel glad to be alive and living in such an environment, and the attractions of the Crow's Nest Pass give force to the suggestion that during the summer months an observation coach should be placed on the C. P. R. trains in order that travellers passing through from distant parts may gain a better impression of this route than by being restricted to a passing glimpse from a day coach or sleeping car window.

Mr. Huntley, of the Bank of Commerce, Macleod, will be acting manager during the three week vacation of Mr. W. L. Rippon.

Mr. and Mrs. A. M. Morrison and daughter Ruth, accompanied by C. W. McKinnon left yesterday for an auto tour for two weeks to the coast cities.

Elks Honor Depart- ing Officer Friday

Principal R. G. Powell Given Fare-
well Smoker and Presentation
by B. P. O. E. Lodge

There were rounds of revelry and mirth proceeding from the K. P. hall last Friday evening, the reason being a farewell smoker in honor of Principal Powell, exalted ruler of the local Elks lodge, and his brother Elks to show their appreciation of his all round good qualities met to present him with a token of fraternal esteem. Mr. Johnson chairman of the school board, acted as chairman in his usual genial manner, and a very good program was given under the direction of George Brown, the following contributing: Songs by E. Hill, Mr. Cuthbert, P. Smith, H. Parkinson, Mr. Wooten (Blairmore Lodge), J. Hart, J. Bell, co. net solo by J. Moore, and violin solo by S. White. Messrs. Smith and Jones gave a duet.

The presentation of a Duofest set was made on behalf of the lodge by Alex. Morrison, and he expressed his regret at losing an efficient officer and one who had been an enthusiastic worker for Elksdom in Coleman, to which Mr. Powell replied that though leaving the town which he liked so well and where he had spent several happy and enjoyable years, he would always treasure the pleasant memories of their work together and felt confident that the lodge would continue to take a leading part in community welfare work. Though going to Calgary to join the high school staff there, his thoughts would often travel back to the pleasant times he had spent in Coleman and the Pass.

Mr. Powell will spend some time holidaying and enjoying the pleasures of fishing before leaving to take up his duties at Calgary, and a host of friends will join in wishing both Mrs. Powell and himself continued happiness and prosperity in their new home.

Attend the Dance on Wednesday Next

Help in Community Movement to
Defray Cost Swimming Pool—
Fortnightly Dances
Being Held

In order to pay sundry current expenses in connection with the swimming pool, which has proved a source of enjoyment and delight during the summer, fortnightly dances are being held by the committee, the next being on Wednesday, August 10.

A special prize is given to the holder of the lucky number on his or her admission ticket, and the cost of admission is one dollar for gent's and a quarter for ladies. As Mrs. Altmann's orchestra has been engaged for the dances, patrons are assured of a very enjoyable evening. By giving your support to these dances the cost of operating the swimming pool is greatly lightened. Remember the date, Wednesday next, August 10, and be there.

On the Side

(By the Sydenham Philosopher)

Are You a Frozen Fish?

We will open today's screen with a bit of verse we found in a copy of Outers-Recreation the other day. It strikes us as being descriptive of some people whom we all meet.

"You've seen the type of frozen fish who never plays the game, who never smiles, nor knows Love's whiles, who thinks all life a frame . . . They seem as if they're frozen stiff and yet they do not die—"

On the ice, on the highway,
Frozen fish!
Shivering along Life's byway
Frozen fish!

All for self, no thought of others,
Chilly even to their mothers,
Yes, that's all they are, my brothers,
Frozen fish!

Canard Representative Here

Eric R. Wishart, of Winnipeg, representing the Canard steamship line, was a business visitor in Coleman yesterday.

He was favorably impressed with the industrial possibilities of the towns in the Crow's Nest Pass, and made short visits at various other towns before returning to Winnipeg.

FOR BRITAIN AND UNITED STATES TO CO-OPERATE

London.—The Marquis of Reading was the chief speaker at a dinner given at Dartmouth House by the English-speaking Union in honor of the visiting United States editors.

"I am confident that His Majesty's government is seeking every possible means to arrive at an agreement in the question which is now the subject of so much discussion," said Lord Reading, alluding to the disarmament dispute at Geneva. "His Majesty's government does not speak for one party. Certainly the party to which I belong (liberal) is associated with the government in the desire to reach an agreement."

During the Great War America and this country worked in the closest co-operation with the utmost goodwill, striving for one common purpose. Are we still engaged in this common purpose? Are we still seeking international peace, and striving to avoid any recurrence of war?

"We astutely have a common purpose, and can we not work with the same co-operation and goodwill, with the same trust we had during the war, striving again for the common purpose, and perhaps, may I add, in a nobler purpose?"

"If—God forbid—anything should happen to make our paths diverge, then, in my mind, the world will still have a terrible disaster. I believe in my innermost heart, after an experience of many years in this country and in yours, there is an almost sacred desire that we should achieve peace and maintain it. We should do all in our power to preserve it in the future and continue to labor to gether to the best of our ability to that end."

Determined To Make Trip

Schiller Will Resist If Leave Of Absence Refused

Port Arthur, Ont.—Lieut. Clarence (Duke) Schiller, left Port Arthur for Shewanawan sub-base, to arrange for transfer of his survey work.

Lieut. Schiller explained before his departure that he has not resigned from the Canadian air service, but that he was awaiting consideration of his application for leave of absence. Only as a last resort he declared, would he resign and in the meanwhile plans are being made for his contemplated flight from Windsor, Ont. to Windsor, England.

Propose To Abolish Wars

Scheme Under Consideration By Institute Of Pacific Relations

Honolulu.—The draft of a proposed treaty to abolish war, submitted by the Institute of Pacific Relations, has been presented by a U.S. delegate, Prof. James T. Shotwell, of the History Department of Columbia University.

Divergent views as to the applicability of the proposed "American-locarno" to the nations involved, were expressed by the delegates, particularly those from Japan.

Noted Artist Dead

London.—Solomon Joseph Solomon, noted British artist who called attention to the need of camouflage in modern warfare and initiated it in the British army at the outbreak of the world war, died in London, July 27. He was born 67 years ago. Among his many works are the decorations in the Royal Exchange and the House of Parliament.

Canadian Bacon For British Troops

London.—Canadian bacon is now being supplied to the troops in Great Britain. Sir Laming Worthington Evans, Secretary of Staff for War, stated in reply to a question in the House of Commons recently: "A trial also was being given in overseas stations where its suitability had not yet been established."

Take Course In French

Quebec, Que.—Eighty women teachers of French, and ten or twelve men, are taking advantage of the new course in Oral French which is being held, for the first time, this year in the Silfery Academy, Quebec City Department of Education.

Crossing Channel In Canoe

Dover, Eng.—A French canoe has beaten the English Channel in a canoe. He was M. Marcel, who started from Cape Gris Nez at 11:30 a.m. and arrived here in convoy of a tug at 4:20 p.m.

W. N. U. 1693

Wants Land For Air Field

Detroit Airplane Company Asks New Ground To Grant Tract

St. Johns, Md.—The Newfoundland government has been requested to grant a tract of public land near Harbor Grace on the North side of Cape Breton Bay, for purposes of transatlantic aviation.

Fred Koehler, of Detroit, representing the Sison Aeroplane Company, petitioned the government to grant a piece of land near Harbor Grace to be used for two flying fields.

On each site would be established a runway 300 feet wide and 1,000 feet long.

The fields, Koehler said, would be used primarily by the War Air Service Company of Detroit, which is sponsoring an attempt to fly around the world in 15 days.

Afterward, Koehler said, the fields would be open to all transatlantic flights in either direction. The government was considering the application.

Decrease In Value Of Creamery Butter

Although Canada's 1928 Production Higher Than Previous Year

Ottawa.—An important series of reports have been released by the Dominion bureau of statistics, based on statistics showing production in a number of Canadian industries during 1928.

Canada's production of creamery butter in 1928 amounted to 17,156,375 pounds valued at \$62,025,495, an increase in quantity compared with 1927, but a decrease in value of \$93,615.

Prince Edward Island, Ontario, Manitoba and Saskatchewan record slight increases in production, while the other provinces show decreases. Cream production in Canada advanced to a new high mark in 1928. The total production for the year was \$53,728 tons worth \$2,770,813 against 74,323 tons at \$2,389,891 produced in 1927.

Estimate Number Of Harvesters Required

Approximately 21,000 Will Be Needed For Western Canada

Winnipeg.—Approximately 21,000 harvesters from Eastern Canada and the Pacific coast will be required by Western Canada to garner this year's crop.

This estimate was arrived at at a meeting here of representatives of the railways, the labor bureau of the three prairie provinces and the government employment service. The first call for harvest help last year was for 58,000 men.

The distribution of imported harvest workers will be 20,000 to Saskatchewan, 8,000 to Alberta and 3,000 to Manitoba.

The first harvest special train will start moving from British Columbia to the prairies about the middle of August and the first from Eastern Canada about September 1.

To Stage Grand Rally

Conservatives Preparing For Big Convention At Winnipeg

Ottawa.—Manitoba Conservatives are preparing for the Conservative convention to be held in Winnipeg, October 11. A manager is being appointed to carry out a full detailed program, according to advice received at opposition headquarters from General A. D. McRae, M.P., chairman of the national committee organizing for the meeting. Several thousand people from the prairie provinces alone will attend the convention, in addition to the official delegates, states General McRae. Arrangements are being made in the convention hall to accommodate 7,000 people.

Automatic Radio For Ocean Boats

London.—All large ocean-going vessels will shortly be fitted with a new automatic wireless alarm apparatus. The apparatus which has been designed by the Marconi Company will automatically pick up, discriminate, and then call attention to the fact that the vessel is within wireless range for sending out distress signals. This will remove operators from the necessity of being always at their post.

Immigrants As Harvesters

Brandon, Man.—It is believed that the settlement of immigrants in this district this year will greatly assist in harvest operations. At the employment bureau here it was stated that Brandon's need this year for the harvest is 2,000 additional men. This is 500 lower than a year ago, but the coming of many immigrants helped solve the situation considerably.

London Paper Fears Clash Of Popularity

"Truth" Afraid Canada Cannot Avoid Showing Preference For Either Prince Or Premier

London.—Truth, society and financial weekly, in a recent issue, says whoever planned the joint tour of the Prince of Wales, Prince George, and Premier and Mrs. Baldwin to Canada must be singularly lacking in imagination.

"The Prince of Wales is not the Sovereign and Mr. Baldwin is not a Pitt," Truth says, "but it is tactless to say the least of it, to run the risk of a clash of popularity and unsought rivalry between the Heir Apparent and the Prime Minister of Great Britain. How are the Canadians to divide their hospitality as to betray no sign of preferring the Prince to the Prime Minister or vice-versa?"

Truth proceeds to declare that in its opinion the tour is a mistake because of the state of Premier Baldwin's health.

"Mr. Baldwin is going to take a busy man's holiday" by visiting a country where, in addition to long railway journeys and exhausting public meals, he will be expected to make the most difficult kind of speeches about nothing in particular at every place he visits."

SOVIET ACTIVITY INTOLERABLE TO FRENCH PEOPLE

Paris.—Jean Herbet, French ambassador at Moscow, who recently spent two weeks in Paris, returned to his post bearing instructions that the Soviet government be informed that the Soviet government in France is becoming intolerable to French public opinion. It was learned here.

Although the French foreign office said that M. Herbet was not instructed to make official representations involving both governments in an exchange of notes, official circles are certain that he was to make the Soviet government cognizant in an informal and unofficial manner of the sentiment of the French people and government.

While in Paris the French ambassador to Moscow had conferences with President Doumergue, Premier Poincaré and Foreign Minister Briand and also discussed the Russian propaganda situation with prominent personalities of the press, commercial, industrial and banking world.

He is said to have left Paris with the personal conviction as well as official advice that France is in a position that it believes to be a connection between the Communist movement in France and the diplomatic mission of Soviet Russia in Paris. He is reported to have informed Foreign Minister Tschitcherine quite plainly that if the Soviet Government entertains hope of coming to an agreement with France on the lines of trade, commerce and industry, the Soviet embassy at Paris must put a stop to its alleged activities here.

Girl Guides Tour Canada

Over 100 Girl Guides from the eastern provinces and three prominent English guides, entrained from North Toronto station recently on a special Canadian Pacific train for a tour through the western part of Canada, particularly the Rocky Mountains. The Canadian Rockies where the party will make camp at Banff and other famous mountain resorts.

This adventure in the mountains has been arranged in the midst of the Guides for many months. The feature of their tour will be camps set up at various points in the Rockies, the first at Penitence and then at Kelowna in the Okanagan Valley.

From their scheduled camps at Penitence and Kelowna, the girls' eastward journey will be a succession of mountain camps when they will pitch their tents as they have done for the last six years in many parts of Ontario. The longest stay will be at Banff, where they will get a real taste of outdoor life. During the entire camping stops the girls will adhere strictly to camp rules, up at six and lights out at eight.

Their journey across Canada will bring them into contact with numerous western tourists who have arranged to entertain the entire party in the principal cities enroute.

BETTER SPIRIT NOW PERVADES NAVAL PARLEY

London.—Hope that the tangle arising out of the Geneva naval conference will soon be unravelled is growing in official circles in the British capital. This is due largely to the statement made in the House of Commons by Sir Austen Chamberlain, Secretary for Foreign Affairs, outlining anew the whole British attitude toward the parleys and containing the declaration:

"There need be no difficulty in arriving at a temporary arrangement about the immediate future of cruise or building."

It was this question upon which the negotiations stalled. Sir Austen appeared in Parliament soon after Mr. Hon. W. C. Bridgeman, First Lord of the Admiralty, and Viscount Cecil, the chief British delegates to the naval conference started back for Geneva to re-open the discussions with the United States and Japanese delegates. The purpose of the British Secretary's statement was to put the full weight of the British Government behind the proposals the delegates will make.

A second reason for the statement was to remove the misunderstanding which the British Government believes exists in the minds of many Americans regarding the British aims at Geneva. Although the statement was made by the British Minister, the United States was not mentioned. It was nevertheless admittedly intended for the unseen audience of the people of the United States.

The Foreign Minister informed the Commons that the British Government had even been charged with a desire to destroy the principle of sea power equality as between Great Britain and the United States, established at the Washington conference, and he added emphatically:

"There is no foundation for such suspicion." He replied the British Government to complete agreement with the two-fold purpose of the Geneva meeting as outlined in President Coolidge's invitation—reduction of naval expenditures, while maintaining national security.

Receive Humane Medals

Hamilton, Ont.—Two westerners have been awarded humane medals for work by the Royal Humane Association, according to an announcement made here. They are Laddie Jason, 14 years of age, Moose Jaw, who rescued two girls from drowning and who a week before, had rescued a chum from a similar fate and Harvey Capman, for the rescue from drowning of Edd Price at Nanaimo, B.C.

Life Is Threatened

Dublin.—Eamon de Valera, following the assassination of Vice-President Kevin O'Higgins, received numerous threatening letters and the plain fact that if the Soviet Government entertains hope of coming to an agreement with France on the lines of trade, commerce and industry, the Soviet embassy at Paris must put a stop to its alleged activities here.

Manitoba Wheat Pool

Fourth Annual Meeting Is Held At Brandon

Brandon.—The fourth annual meeting of the Manitoba Co-operative Wheat Producers Ltd., was opened in the city hall. Approximately 280 delegates and thirty-two visitors are registered, making this the largest meeting ever held by the pool.

The membership in the wheat and coarse grain pools July 15 was 18,758. A drive has commenced for renewal of the contracts that will expire in 1929, and while only a small territory has been canvassed, practically all the old members have again contracted as well as 520 new members.

For the 1928-29 crop the Pool operated 8 elevators. This year 39 were in operation and next year about 60 will be run by the Pool. In 1925-26, every unit showed a surplus, making 199 cents to 67.5 cents a bushel; 1926-27 figures are not yet available.

The central selling agency which is the selling body for the three wheat pools, the Manitoba Wheat Producers Ltd., has agencies established in 15 different countries, and at present is considering the opening of a London office. The agency, the report states, has made its own market for wheat at 90 per cent. of its grain outside the ordinary channels.

An Ontario pool has just been organized, with about 8,000 members, and will also sell through the Central Agency.

Urge Sales Tax Cut

Resolution Adopted At Convention Of Retail Merchants Association

St. John, N.B.—The Dominion Board of Retail Merchants Association of Canada here adopted 20 resolutions. The most important of these asked further reduction in the sales tax, protesting against the reduction in the post office rates, requested tax on mail order houses, based proportionally on the operating expenses of merchants in the municipality in which they are conducting.

It is urged that such a tax be paid to the government and distributed in proportion to the municipalities. The association pledged cooperation with other organizations with remedying of the price evil on nationally advertised goods and the abolition of the stamp or "nuisance" tax.

World Poultry Conference Is Well Attended

Ottawa.—With forty-two countries officially represented, the third world's poultry congress was opened here.

Nearly five thousand people including producers and members from five continents, were present when Hon. W. R. Motherwell, minister of agriculture for Canada, initiated proceedings. Some forty-two states of the American Union were represented by delegates on behalf of the Dominion had delegates on hand.

On behalf of the British Empire, His Excellency the Governor-General, Viscount Willingdon, extended a hearty welcome to all international and Canadian delegates. Premier W. L. Mackenzie King, for the Dominion of Canada, greeted the visitors, while Mayor John Ballantyne, Ottawa, presented the key of the city to all members of the International Association of Poultry Investigators and Inspectors. President Brown, Hon. William Phillips, United States minister to Canada, W. D. Wilson, Holland, and Prof. Don Cussey, Spain, responded to the speeches of welcome.

At the conclusion of the formal opening Viscount Willingdon was the guest of honor at a luncheon tendered by members of the congress.

Every inch of space in the auditorium was occupied when Hon. W. R. Motherwell, minister of agriculture, as honorary chairman, initiated the proceedings. On behalf of the British Empire, His Excellency the Governor-General, Viscount Willingdon, heartily welcomed the international and Canadian delegates.

President W. L. Mackenzie King greeted the visitors, on behalf of the Canadian people and a civic welcome was then extended by Mayor John Ballantyne, Ottawa.

Edward Brown, of London, Eng., was chosen chairman, briefly responded to the welcome extended. For the delegates from some 42 states in the American Union, Hon. William Phillips, United States minister, responded to the greetings for the efforts by the Canadian government towards the comfort and happiness of its compatriots, many of whom were visiting the Canadian capital for the first time.

At the conclusion of the formal opening Viscount Willingdon was the guest of honor at a luncheon tendered by members of the congress.

MANITOBA POOL WILL ACQUIRE MORE ELEVATORS

Brandon.—At the annual meeting of the Manitoba Co-operative Wheat Producers Ltd., it was decided to embark on a more aggressive elevator building policy in response to a call for a larger program than is possible under the present two cents per bushel deduction provision, the directors submitted a resolution that bonds be issued to build more elevators.

As collateral the Manitoba pools interest in the existing pool elevators will be hypothecated up to 85 per cent. of the production carried by a large majority.

Six out of the seven former board directors were re-elected.

Ray McPhail, Brandon, secretary of the Manitoba Wheat Producers, stated that the pools' interest in the provincial selling agency in St. Boniface, which is expected to open about the new year.

Mr. Brouillette, director of the Saskatchewan Wheat Pool, urged the delegates not to be blinded to the basic reasons for cooperation, nor to let the fact of elevator obscure the real object, which is the better marketing of the crop.

The pools have disproved one ancient misconception, he told the meeting, and that is that the farmers will not stick together. It also has been shown that farmers, when in the early days, worried by hostile propaganda did the intelligence of the farmers as great an injustice as the instigators of the propaganda. It is no longer causes uneasiness.

It was decided to hold the meeting in Brandon next year, and after votes of thanks the conference adjourned.

Dowager Queen Marie Is Relatively Poor

Cannot Maintain Dignity Of Court Unless Government Grants Allowance

Bucharest.—King Ferdinand's death has left Queen Marie relatively a poor woman. Unless the state comes forward, with help for the now dowager queen she may be obliged to convert some of her jewels and other possessions into cash.

An alleged anecdote, Ferdinand's \$300,000,000 lot fortune (about \$1,500,000) will be apportioned equally among the King's five children including Prince Carol, who will receive about a third of the fortune, however, receives nothing but use for life of certain of the King's properties and palaces.

Queen Marie is said to feel keenly over her financial situation and efforts have been started by friends to induce the cabinet to recommend to parliament a liberal allowance in order to enable her, as dowager queen, to maintain her former dignity and liberality of her court.

Preparing For Flight

British Aviators Will Compete For Prize Of \$5,000

Dublin.—Col. F. F. Michin, of the British Imperial Airways, and Leslie Hamilton, British air and owner, are in the midst of making preparations for a transatlantic flight, from Dublin to Clifden, Galway, to pick out a definite point for their hop off. They hope to leave about the middle of August in a Fokker monoplane.

The latest statement of the flyers' plans show that their first objective will be Ottawa, whence they will fly to London, Ont., and thence back to London, Eng., their desire being to win the \$5,000 offered for that feat.

Lindbergh Heavily Insured

New York.—"The" are insured for \$100,000 during the tour. The premium on a policy on Col. Lindbergh's life with his mother as the beneficiary, was \$58,825. Other policies written by four companies are \$15,000 on the Spirit of St. Louis, if destroyed by fire; \$100,000 for property damage and \$100,000 for public liability. Any aviator may now have his life insured for a special premium.

Retail Merchants Association

St. John, N.B.—J. T. Crowley, Toronto, and Vancouver, president of the Canadian Fair Trade League, was elected president of the Dominion Board of the Retail Merchants Association of Canada here. Regina was selected for the Dominion convention of the board for 1929.

Want Tariff Increased

Ottawa.—Application has been made to the United States tariff board for an increase of two cents per pound on the maple sugar duty.

Tar Sands for Jasper Roads

Ninety carloads of tar sands will be shipped from McMurray during the present summer. It is announced, to be used in roadmaking in Jasper Park. The work of sur-

facting the roads is being supervised by Dr. S. C. Ellis of Ottawa. Shipments are being made at the rate of three or four cars each week and it is expected that some three miles of road in the park will be covered in this way during the season.

THE COLEMAN JOURNAL

2ND AVE., E., COLEMAN, ALBERTA. H. T. Halliwell, Editor and Publisher
THURSDAY, AUGUST 4, 1927

Boost for Coleman

The most effective way in which to combat the mail order houses is for the local merchants to use the same methods as they use, and to point out to the buying public the advantages of buying at home. Coleman is a good town in which to live, it has a big payroll, and there is no reason why the greater part of the money that is spent for the necessities, should not be spent right here.

It is very true that people shop where they are invited, and the experience of merchandisers is that a percentage of the annual turnover can be profitably spent in newspaper advertising. The way to keep people informed of store values is by advertising in the local newspaper. It cannot be done by word of mouth. It would take too long, and the people are accustomed to reading the printed word and the advertisements.

The Journal's policy is to boost for Coleman 100 percent. It aims to have every store and business represented in its columns each week, and it should be the policy of every business man to make every effort in his power to develop in Coleman as much business as he possibly can in his own particular line. If business men are loyal to each other, and co-operate in developing business in their home town, beneficial results are bound to follow.

The old saying that "everything comes to he who waits" does not apply in business. It comes to the man or town that goes after it, and every business man or storekeeper must show by his own methods and prices that he is desirous of building up his clientele and keeping 100 per cent of the business at home.

The Journal is fully convinced that by a persistent policy of co-operation and advertising by business men, and the determination to serve the public to the best possible advantage, that mutual benefit can be obtained for all concerned and an increased volume of business secured.

Believe in your own business, in your own town and your own ability to accomplish things, and success is within your reach

BEST IN TOWN

Here and There

Living births in Canada during 1920 totalled 252,205, the birth-rate for the nine provinces being 24.5 per thousand of population. Deaths at all ages numbered 107,318 in the Dominion, a rate of 11.4 per thousand. Excess of births over deaths in the year was 124,887. A total of 66,570 marriages were reported during the year.

The general cool weather for this season of the year in British Columbia and the amount of moisture about has saved a great deal of timber from destruction by fire. So far this year there have been only 216 forest fires in the province, as compared with 570 for the similar period of last year. The present condition of the woods are excellent.

As a sign of agricultural progress in the west and industrial prosperity here, the International Harvester Company, Limited, have just sent two of the largest trainloads of threshers ever shipped to the west over C.P.R. lines from the east, the first train consisting of 43 cars with 111 threshers and the other of 43 cars containing 103 threshers.

The ratemakers of Victoria have endorsed a by-law providing for civic support of a proposal for the establishment by British interests of a motion picture producing industry here, by a vote of 2,137 to 663. The city was thereby authorized to guarantee bonds of the concern to the extent of \$200,000 after \$500,000 had been raised by British motion picture distributors and exhibitors.

A thriving new industry in Southern Alberta, which is making progress and is full of promise, is that of the raising of polo ponies. Three ranches are engaged exclusively in this industry and ranchers and farmers are coming increasingly to engage in it as a side line. About five carloads or one hundred polo ponies leave Southern Alberta annually for the United States.

The Development Branch of the Canadian Pacific Railway in co-operation with Macdonald Agricultural College is conducting experiments on the farm of Donald Fraser at Flaster Rock, N.B., to ascertain whether gypsum, of which there are large deposits, has special value in connection with potato culture. Members of the staff of the college are supervising field tests on the farm.

The itinerary of the party of one hundred British newspaper men who will arrive at Quebec August 12, indicates that during the month they are in Canada the Britteners will visit practically every corner of the Dominion and, besides visiting every city of importance, have an opportunity of studying at first hand Canada's natural resources and investment possibilities. They will travel across Canada and back on Canadian Pacific lines.

Ottawa, Ont.—Canada's 1927 wheat yield for the season 1927 is forecast at 325,075,000 bushels by the Dominion Bureau of Statistics. The estimate for the three Prairie Provinces is 308,062,000 bushels and for the rest of Canada 20,022,000. The total yield of oats is estimated at 389,768,000 bushels, of which 225,227,000 bushels is assigned to the Prairie Provinces. Barley is estimated at 89,839,000 bushels, of which the Prairie Provinces are expected to furnish 71,724,000 bushels. Rye is given at 12,155,000 bushels, of which 10,664,000 is allowed for the Prairie Provinces. For flaxseed, 5,319,300 bushels is estimated, of which all but 107,000 bushels is allowed for the Prairie Provinces.

Agnes G. W. Wyllie
Will Appear Here

Brilliant Young Musician to Give
Piano and Violin Recital
Under Auspices K. of P.

The Knights of Pythias of Coleman have been very fortunate in securing the services of Miss Agnes G. W. Wyllie, the brilliant young musician of Calgary, who will give a piano and violin recital at the Grand Theatre on Wednesday evening August 31.

This young artist was born in the "Land of the Heather", at Dunfermline, Fifehire, and is the eldest daughter of Mr. J. Wyllie, well known in the mining industry throughout the Crow's Nest Pass, having resided in Fernie and Homer in past years.

Miss Wyllie received her piano instruction under the supervision of Mrs. Annie Glenn Broder the well-known musical critic of Calgary. She also received violin instruction under the supervision of Mrs. Dudley Smith, who taught the famous Joe Marks, who is now making a wonderful name for himself in the United States. Miss Wyllie has played before numerous audiences and recently was selected to play at the Palliser Hotel, Calgary, before some of the best musicians in the country. In the near future she will go on an extended concert tour throughout Europe.

The program which she intends playing here will be compositions from some of the classics by such great masters as Mozart, Chopin, Borowski, D'Ambrosio, etc.

Reserved seats will be on sale next week at Rushton's Cash Grocery Store, and general admission tickets can be had from any of the K. of P. Brothers.

To Publish New Health Bulletin

A bulletin is being prepared under the direction of Hon. George Hoadley, Minister of Health, on the subject of summer infections and will be available for distribution shortly. Typhoid and intestinal infections in children are the two troubles which will be chiefly emphasized and attention to both by way of preventive measures is urged upon those particularly who are holidaying during the summer.

WHEN BETTER AUTOMOBILES ARE BUILT McLAUGHLIN-BUICK WILL BUILD THEM

Great Pier Dedicated to Empire Service

1. New C.P.R. Pier at Vancouver.

2. Bronze plaque unveiled by Mayor Taylor of Vancouver.

One notable feature of Greater Vancouver's celebration of the Diamond Jubilee of Confederation—and one that no other city in the Dominion can boast of duplication—is the dedication and official opening of the new \$6,000,000 Canadian Pacific Pier B-C.

The new mammoth pier is the second longest in the world, and was planned with an eye to a prosperous future when Vancouver will be one of, if not the biggest, port on the Pacific coast, and designed to accommodate at least two of the greatest liners built.

It is a far cry from the first wooden pile ocean docks built by the Canadian Pacific in the early spring of 1887 when Vancouver was a city of stumps and possibilities to the present pier with nearly 3,000 feet of berthing space available and accommodation for the cargoes of a dozen of even the most modern ocean gray-

hounds. Representing the last word in modern machine construction, the new pier is also notable for the pleasing manner in which the practical has been combined with the artistic.

The Canadian Pacific is interested chiefly in the trade with the Orient, Australia and New Zealand. Although imports and exports are of a mixed character, the most valuable single article is silk. Silk shipments must be transferred from boat to rail with the least possible delay. Facilities embodied in the construction of this pier ensure the rapid and careful handling of all cargoes.

While designed primarily for the use of its own ships, the C.P.R. will allow pier B-C to be used by the ships of other lines. Its length of 1,140 feet permits the docking on either side, of the largest of the present day trans-Pacific boats—the Empress of Canada, 640 feet in length—with a

smaller vessel. Its width of 281 feet permits a moderate sized boat to be docked at the off-shore and at the same time that either or both sides of the pier are in use.

A special feature of the construction of the pier is that a promenade is constructed down each side of the pier leading from the head-house over the roofs of the freight sheds. Connections are made from this promenade to the ships by a long gangway so that passengers may embark or disembark without hindering the freight handling on the lower deck.

In officially opening the pier Mayor Taylor unveiled a magnificent bronze plaque, a gift of private citizens of Vancouver, which bears the following inscription: "Pier B and C. Formally Opened and Dedicated to the Canadian Pacific Empire Service during Greater Vancouver's Celebration of Canada's Diamond Jubilee of Confederation by Louis D. Taylor, Mayor of Vancouver."

WORLD HAPPENINGS
BRIEFLY TOLD

Laden with the spoils of their many victories, the greater number of members of the Canadian Blaxey team are returning to Canada.

Special despatches from Tomak say that the Siberian authorities have placed a ten-year ban on sable hunting. Extinction of the animals shortly is feared.

His Majesty the King has conferred a knighthood of the Order of St. Michael and St. George upon Dr. W. F. Grenfell, known for his work among the sailors and fishermen of Newfoundland during the past 35 years.

Patrick Dillon, who was elected as a Republican for Dublin county and a signer of the protest of Eamon De Valera against the oath to the king, took the oath and his seat in the Dail. There was no demonstration when he made his appearance.

Reports that stray buffalo from the herd, moved north from Watnawright have been making trouble in the farming country around Fort Vermilion are to be investigated. Complaints have been made that some 15 animals of the first contingent have mixed with some cattle and destroyed crops near Vermilion.

The Post Office authorities are issuing a warning that all parcels addressed to Great Britain and other countries must be fully prepaid when dispatched from Canada, as post masters are instructed to see that every effort is made to prevent the mailing of short-paid parcels to places outside of Canada.

Coal production in Saskatchewan during the first six months of this year exceeded by 7,538 tons the output of the province for the same period of 1928. The official figure issued by the Provincial Labor Department is 194,578 tons. This mark was surpassed in January to July of 1929 by nearly 9,300 tons.

E. P. Ranch Improved

House Has Been Enlarged and Property is Beginning To Yield Returns

Many improvements have been introduced on the Prince of Wales ranch since his last visit in 1924. The property is beginning to make some return to its loyal owner for the sums he has spent in stocking and developing it.

It has always been the Prince's ambition to make his ranch, more than anything else, a model of its kind and an example to other farmers in the Dominion. The E.P. Ranch extends more than 6,000 acres, small as important ranches go, but it is high-grade land, and is on one of the richest grain-growing and stock-raising regions to be found in Western America.

The ranch house has been enlarged and otherwise improved since his Royal Highness last saw it. A new lounge hall and extra bedrooms have been added. The whole dwelling is simply furnished. A few comfortable lounge chairs, a well-fitted couch or two, and one or two water-color pictures of neighborhood beauty spots are the only appearance of "luxury."

Its sporting equipment, however, is very complete, and the Prince is able to enjoy good sport on his own property wild ducks abound on one or two small lakes and on a tributary of the High River that winds through the ranch and provides it with water. Mountain trout are numerous in this stream, some of them attaining considerable size, while not far away prairie chickens and partridges are to be found in flocks at certain seasons of the year. When bigger game is sought, the Prince has not much farther to ride before he comes across the trail of herds of wild deer that range over the foothills of the Rockies.

Discontinue Bird Sanctuary
Leo Lathiche, after some seven years as a bird sanctuary, is likely to be discontinued as such. The Alberta game branch is advised that the Dominion parks department is now considering its abandonment and the reservation of other lakes in the vicinity instead. This action is understood to be the outcome of an agitation by settlers around the lake, who have asked to have the restrictions lifted.

Customer: I want to return this book I bought. "Stories for All Occasions."

Bookseller: What's the matter with it?

Customer: It's a fake! There's nothing there for a man to tell his wife when he gets home at 2 a.m.

W. N. U. 3622

A Difficult Salvaging Job

Raising Of German Battle Cruiser Is Penetrating Feat

Draped in silence and seaweed, the keel of the battle cruiser *Moltke* has been lifted above the surface of the water in the old anchorage ground at Scapa Flow in the Orkneys, where the German fleet was interned after its surrender in the First of March on November 21, 1918, and where the vessels were scuttled by their crews on June 21, 1919.

When the wreck 11 finally beached in shallow water to be broken up, one of the most difficult jobs in the history of salvage will have come to a successful conclusion. The 27,000-ton *Moltke*, another of the scuttled battle cruisers, was raised with less difficulty. She lay on an even keel, so that lifting her, while a tremendous job, was a straight textbook problem. The lifting of the *Moltke*, which turned turtle as she sank, has presented great difficulties. In her case the successful salvage work has been due largely to the inequity of E. F. Cox, a shipowner, and his partner, Mr. J. H. Cox, who are now in London in his early forties, who at Scapa Flow is usually found snarled from head to foot with seaweed and rust.

Mr. Cox is a shipbreaker and scrap iron merchant who never did a salvage job in his life until he went to Scapa Flow three years ago. In the lonely Orkneys, which lie so far north of Scotland that you can read a newspaper outdoors at midnight at this time of year, he and a gang of 100 laborers have lifted 22 scuttled destroyers, the battle cruiser *Blindenberg* and now the *Moltke*.

In ordinary salvage no two jobs are ever exactly alike, and that holds true at Scapa Flow, where the scuttled vessels lie in every conceivable position. Mr. Cox has pumps capable of handling more than a ton of water a second. He has pneumatic hammers, drills and riveters capable of delivering 1,500 blows a minute, either under water or above the surface. He has electric lances to flume the water in the slinky hold of a sunken vessel. He has a huge pontoon of various sizes, shaped so that it fits closely to the outer skin of a sunken ship, when fastened into place beneath the water, are pumped out and the air within them exerts its lifting power. His salvaging ship—a floating machine shop with derricks capable of handling weights up to fifty tons—has powerful engines for towing.

Light Pierces Fog

Rainbow Super-Beacon Light Can Penetrate Mists

Raymond R. Macchietti, of New York, son of R. H. Macchietti, one of the leading X-ray experts in America in the early stages of its development, is demonstrating his rainbow super-beacon light, which penetrates fog and makes possible airplane landings in bad weather.

The light, produced by devices invented by Mr. Macchietti, has been exhibited at Haddley and other aviation fields.

"We have demonstrated that this light can be seen many miles away, perhaps fifty," said Mr. Macchietti. "It is a form of electric illumination without a filament. It is a 'cold light,' or produced without appreciable heat, by passing an electric current through rarified neon gas. The color is an unusual orange red, of 10,000 candle power. On very favorable days one at Sandy Hook was seen fifteen miles.

Government agencies are manifesting interest in Mr. Macchietti's process, and the device holds them. The Bureau of Standards made a favorable report on the light.

Boats Were Held Up

Late Tide On Thames Caused Mite Sensation in London

The Thames as a rule is a most punctual stream and the steady ebb and flow of its tides are generally so certain to follow the figures printed in the shipping journals that any deviation from the expected produces a small sensation on the river. On a recent day, however, when the London correspondent of the *Christian Science Monitor*, the flow was due to start at 9.51 a.m., but failed to put in any appearance until after 10. Many boats, including the passenger boats that are now taking thousands of holiday makers down the river to Margate, were held up for an hour.

"The Thames is really very punctual in its tides," said the river superintendent of the Port of London Authority, "but once in a while it acts up, and the tide is either early or late. The delay of the flow was due to westerly wind in the Channel and a change in the air pressure caused by the wind."

Will Not Have Telephone

The Claims Division of the general government accounting office at Washington has 500 employees and not a single telephone. S. R. Tullies, chief of the division, says his business is best transacted by correspondence, but his policy has drawn fire from many who criticize the slow methods employed.

To Meet At Moose Jaw

Advice has been received by the Moose Jaw Board of Trade that the union of Saskatchewan Journalists has decided to hold its 1928 annual convention in that city.

No earthly tax dodger need hope for a clear title to a mansion in the skies.

Only those who can enjoy dining on air can afford to try to lack.

Stars Honeymoon at Lake Louise

Exploring hidden glaciers, fishing, hiking, and making a film of their own with a new camera they had purchased, constituted what Rod La Rocque and Yvonne Binky considered an ideal honeymoon.

The two famous movie stars, who need no introduction to the American public, turned their backs on Hollywood recently for the mountain resort of Lake Louise in the Canadian Pacific Rockies, to spend their honeymoon.

The accompanying photograph shows the six-foot-three screen star and his beautiful Hungarian actress bride, photographed as they were wandering along a quiet path not far from the Chateau Lake Louise where they were guests during their two-week stay in the mountains. The wedding was attended one of the most popular among moving picture fan-club experts and other career chasers, that Hollywood has ever known.

Exploring hidden glaciers, fishing, hiking, and making a film of their own with a new camera they had purchased, constituted what Rod La Rocque and Yvonne Binky considered an ideal honeymoon. The two famous movie stars, who need no introduction to the American public, turned their backs on Hollywood recently for the mountain resort of Lake Louise in the Canadian Pacific Rockies, to spend their honeymoon. Wounds Without Killing

Bullet Devised By Eastern Inventor Meets After Entering Body

Composed of glycerine, stearin and an antiseptic compound, a "deathless" bullet, devised by an eastern inventor, is intended to wound a person without killing him. It meets its fate by striking a vital spot. A feature of the bullet is that it makes twice as much noise as an ordinary one when fired, so it would be of aid to a citizen in spreading an alarm. Tests showed that it penetrated a one-inch plate lead, and it was also said to aim to demonstrate its properties.

"She's a finished vocalist, don't you think so?"

"I'm afraid not. They're calling her out again."

A watchmaker has more hands than a centipede has feet.

SUNDAY SCHOOL LESSON

DAVID SPARES SAUL

Golden Text: Be not overcome of evil, but overcome evil with good.—Romans 12:21.
Lesson: 1 Samuel 26.
Devotional Reading: Romans 8:31-39.

Explanations and Comments

1. Saul Seeks David's Life, verses 14-15.—David had taken refuge in the Wilderness of Ziph, and Saul pursued him with three thousand men. Through spies David learned of his coming.

2. David Spares Saul's Life, verses 16-22.—David came upon the place where Saul was encamped, and found Saul asleep surrounded by his followers within a barricade made by encircling wagons. David returned to his own men and asked, "Who will go down with me to Saul?" The proposed exploit must have appeared to all of the Abimelech, the son of Day's sister, returned with David. There was the king's sleep, with his spear, the symbol of royal authority stuck in the ground at his head. "God hath delivered up thine enemy into thine hand this day," said Abimelech to David, as he begged permission to kill Saul with his own sword. But David forbade. "Who can put forth his hand against Jehovah's anointed and be guiltless?" he asked. There was a sacredness attached to Saul's office, and though David could not honor him, he could honor the king.

3. "We honor in our soldiers, not their worth as individuals, but the patriotic valor with which they fulfill their duty; also we must honor the man who, whatever their individual worthiness, the officers they represent."

With a solemn oath, "as Jehovah liveth," David declared that God would carry out his own purpose. Saul should meet his death as God willed, not as he, David, willed; Saul would die by a sudden stroke, or meet his death in battle (as he eventually did); God forbid that he should kill Saul. It will be remembered that in the play of Macbeth, Macbeth starts upon his tragic career when the witches suggest to him that he is to be king. In the play the witches stand for supernatural forces. Macbeth can see no way of fulfilling the destiny predicted for him except through violence. The story of David is even profounder in its moral significance than the story of Macbeth.

From a source which stood to the Israelites as supernatural, David learned that he was to be king but his spirit was "large enough to turn away from the course which to one of the Macbeth type would have seemed the sure road to the fulfillment of destiny."—Bishop McConnell.

Taking the spear which was the token of his office, David took it as a proof of their visit, the two departed, and no one knew of their coming.

Has Innate Terror Of Water

Had Noah's Ark sunk a hundred feet before it scraped bottom, man alone of all the animal passengers would have had to exercise an acquired skill to reach shore and safety.

For man alone is incapable until he flirts off his innate terror of the water and learns to swim.

Every person drowned through inability to swim is a victim of indifference. The parents, with half an opportunity who do not teach their boys and girls to swim are inviting damnation of the most precious fruit of their living.

Irish Public

Safety Act

New Bill Involves Death Penalty For Possession Of Arms

President William T. Cosgrave's positive declaration before the Dail Eireann fixing the responsibility for the murder of Kevin O'Higgins on the extreme wing of the irregular army secured the passage of his drastic public safety act says a despatch from Dublin.

Some members, believing the murder was due to private vengeance, and inclined to accord the Government the exceptional powers the new measure provides for. Particular objection was taken to empowering the police to search for documents, including passports, and the possession of illegal documents and deportation of suspicious persons.

The question was asked as to where deported persons would go, and it was assumed they would be unable to get passports. But Vice-President Blyth said the persons aimed at were only dangerous in Ireland and that passports would be given them to go anywhere else.

The organization which the Government believed to be responsible for the policy of assassination as a means of upsetting the state was described by Mr. Cosgrave as having cut loose altogether from association with Eamon de Valera, and was under the Republican Party's control. It was the remnant of the irregular army which in May, 1923, de Valera called off from the civil war. Arms were not surrendered, but the army was not surrounded, and may still be hidden.

He declared also that documents which had been seized indicated that Irish revolutionaries had been trying to purchase artillery from Germany and rifles from Italy and France. He asserted that one section of the revolutionists threatened to shoot any who took the oath of allegiance to the British crown.

The possession of arms will, under the new bill, involve the death penalty. Some members, while willing to give the Government the power it asked for against crime, disapproved of President Cosgrave's supplemental proposals altering the constitution to block de Valera's political agitation against the oath of allegiance.

A New Idea For Health

Old Hand Breed Says Straight People Never Get Sick

A certain woman had "lost" her health, and before the end of the century few who may indulge their indispositions, she had spent years in the wake of specialists, watering places, baths and sanitariums.

And still she ailed. She didn't imagine she was ill, she was ill! She had headaches, terrible, unbearable ones; she was nervous, tired, and despondent; she had pains all through her; she couldn't sleep.

One day she sprang to her knees. She was reaching it on a western ranch this time trying to scare away the hoodoo of ill health by fresh air and sunshine. There was no doctor near except a little leaved old half-breed who lived in the nearest town, some miles away. They hailed her in a Ford over a white alkali road, found the "doctor" playing poker at a gas station and smelling of fumes which were not of the remotest relation to gasoline.

He waited to cash in before going to his office to attend to his patient. With a few dexterous twists and pulls, the knee was set, and a few directions given.

"Good work, Doctor!" said the wife of the ranch owner, when the patient was safely ensconced in the car again. "You see she's sort of an invalid and we're trying to take good care of her. She's been all over the world and still she's sick. Too bad this had to happen."

"Tell her to sit up straight and she will be long sick," said the doctor with a grin. "Straight people don't get sick."

The invalid is almost cured now. She decided to follow the little old fellow's advice. None of the specialists had told her the real truth. Her posture was wrong and she had suffered the tortures of the condemned as a result. I pass it along to those in search of health. "Straight people don't get sick" might be a good axiom to do in cross-stitch and hang over our doorways.

Neighbor: Why do you whip your little boy? It was the cat that upset him with a grin.

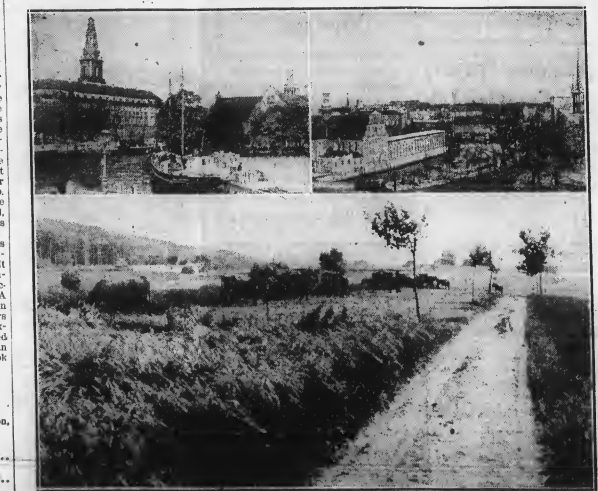

Parent: I can't beat the cat. It belongs to the S.P.C.A.

Factory Doctor:—There's nothing wrong with you but he has.

Third Hand:—What's the Latin sex that, sir, so's I can tell the foreman?

Sometimes money talks, but more often it stops talk.

CANADIAN FARMERS TO VISIT DENMARK

Canada's first farmers' tour to the Old Land now being organized by the Department of Agriculture of the Canadian National Railways, is to go overseas January next. In addition to a tour of England and Scotland, for a study of agriculture and marketing there, the farmers party will also visit Denmark, for a special study of co-operative marketing in the land of its birth.

The pictures above show some of the farmers who will spend a day or two in sight seeing, and also show a typical Danish rural scene. During the visit to Denmark the farmers will also see the famous people's high schools, and also the co-operative bacon factories.

Scotch Shortbread
40c per dozen
A REAL TREAT

COLEMAN BAKERY

Be sure to see the Sharkey Maloney fight at the Palace theatre on Friday evening, August 5. Also a good western feature.

Mrs. Rogers of Sixth street left this morning on a visit with friends at Nelson and other points in British Columbia.

Mrs. J. O. C. McDonald and Miss Verna McDonald returned on Monday morning from Idaho and Washington, where they have been spending their vacation.

Use the Classified Advt. column of The Journal if you have articles for sale, or rooms or a house to rent. It will find a buyer quicker than by sticking up a notice on the wall. The Journal goes into the home.

Work on Moore's filling station is rapidly proceeding under the guiding hand of Contractor D'Appolonia, and will be fitted with the latest device for the convenience of passing motorists, who may tank up with the least possible delay.

Mr. and Mrs. Alex. Hunter and family of seven children, former residents of Coleman, now of Medicine Hat, spent the week-end here the guests of Mr. and Mrs. Dave Roberts.

Mr. and Mrs. Duffield entertained about 36 young people in honor of their daughter Adeline's eleventh birthday on July 26. A very pleasant time was had by all the young folk.

Mr. and Mrs. L. Hanson and Margaret and Olive of Wayburn, Sask., are spending the day visiting Mrs. Halliwell, on their return east after spending a few weeks with relatives in B. C.

Very heavy rains throughout Saturday night made motoring very difficult on the roads east of Pincher Creek, but did not deter Coleman people from starting out on auto trips for the west. Mr. and Mrs. Bowen were among those who left on Sunday morning on a two weeks tour to Spokane, Seattle and other coast cities.

Already "Brother Bills" are active in the first stages of the community carnival, and the first round is proceeding whereby you will have a chance to win a blanket for the modest sum of from five to thirty five cents. At a gathering held last week the winners in a little competition were Jack McLeod, who brought home the bacon, Charlie Makin with a ham, and Robert Graham of Blairmore won a box of chocolates.

Mr. and Mrs. L. Lindoe returned last week from a holiday at New Dayton, Alberta, and were accompanied on their return by Mrs. Lindoe's sister, Miss McCallum. On their way home Mr. Lindoe stopped over at Lethbridge to play in the tennis tournament, and reached the semi finals in the men's singles.

Miss Elsie Disney of Vancouver spent a few days here the guest of Mrs. F. G. Graham, and left on Tuesday with her mother, who was motoring back from Lethbridge with Sergt. and Mrs. Jones, the latter being her daughter. Mr. Disney was an early resident of Coleman. He was engaged in business as a contractor here, and died some years ago while on a visit in England. Since living in Vancouver Miss Disney has become prominent in musical circles, and many of her old friends have listened with pleasure to her programs which have been broadcasted.

Saw a Grizzly

An employee of the International mine who was in the vicinity of the old workings at York Creek is reported to have seen a grizzly bear last week, but the bear did not remain sufficiently long to make a close acquaintance, for he gave a snort when he saw the man and beat a hasty retreat.
